Welcome to Av8n.com - History.
Noble gas is translated from the
German noun Edelgas, first used
in 1898 by Hugo Erdmann to
indicate their extremely low level
of reactivity. The name makes an
analogy to the term "noble
metals", which also have low
reactivity. Wed, 13 Jun 2018
20:20:00 GMT Noble gas -
Wikipedia - A neon lamp (also
neon glow lamp) is a miniature
gas discharge lamp. The lamp
typically consists of a small glass
capsule that contains a mixture of
neon and other gases at a low
pressure and two electrodes (an
anode and a cathode). Sat, 09 Jun
2018 05:37:00 GMT Neon lamp -
Wikipedia - given viscosity, two
main variables affect the
collection efficiency (allowing, as
stated earlier, that impaction is
the predominant mechanism):

Hydrogen sulfide is a flammable,
poisonous gas with a
characteristic odor of rotten eggs.
It is used in the manufacture of
chemicals, in metallurgy, and as
an analytical reagent. Hydrogen
sulfide | H2S - PubChem - Back
