An Characteristics of Embedded
Systems (2) Must be efficient:!
Energy efficient! Code-size
efficient (especially for systems
on a chip)! Run-time efficient!
Weight efficient! Cost efficient -
Dedicated towards a certain

Introduction to Embedded System
Design - in a long list of
embedded products, from
automotive systems to
childrenâ€™s toys. The low cost,
huge range, easy availability and
widespread use of the 8051
family makes it an excellent
platform for developing
embedded systems: these same
factors also make it an ideal
platform for learning about
embedded systems. Wed, 30 May
